Cantilever gate kits

These Cantilever gate kits are designed for applications where a sliding gate is required, but it is not possible or desirable to dig up the roadway.

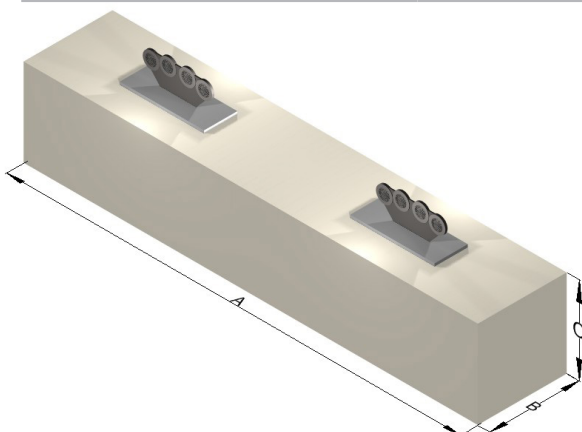

- No need to excavate the roadway and the roadway can be used during installation
- The solution for installing sliding gates on sloping ground
- No track wear even in high usage applications
- Track is delivered in 6m lengths and extra lengths are available
- Free delivery to most of the UK on all cantilever gate kits
